10. 1: Field Optimization of an Inexpensive Colorimetric Assay to Measure Cyanopyrethroid Insecticides on Treated Fabrics and Walls

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date: 01-08-2012

Background: Insecticide-based interventions are used in many vector control programs worldwide for managing diseases such as malaria and dengue. Insecticide-impregnated fabrics, (e.g. bed nets, curtains and clothing), as well as insecticide spraying onto walls (indoor residual spraying) have been shown to be effective in reducing vector-borne disease transmission by providi ...
